

M. Anthony Reimer: Professional Theatre Credits

On the next few pages is a list of credits compiled over the course of my career. The column to the far right denotes what my role was in the project. Where I have listed "Sound Designer", I created all of the sound effects for the project, ranging from the mundane, such as phone rings, to the extreme, a category 5 hurricane. When listed as arranger, I was tasked with taking other's music, usually in the form of a piano score or lead sheet, and orchestrating it for use with vocalists. In the projects where I served as a "Composer", I composed and produced all of the incidental, and practical music that was heard in the project. This ranged from a total output of one or two minutes of solo piano for some projects to as much as forty-five minutes of orchestral and/or electronic music in others.

Theatre:

YEAR	PROJECT	THEATRE	DIRECTOR	FUNCTION
